BY **COGNITAS GLOBAL**

Bringing learning to life

Take your experiential learning delivery to the next level with an intuitive and versatile platform, that reimagines the traditional training model.

view360global is designed to immerse and engage learners by using realistic scenarios that promote higher order thinking skills leading to better outcomes. Packed with features that support a stimulating and safe learning environment for facilitated training delivery, **view360global** is the platform that gets proven results.

It's a powerful learning tool that uses mixed media to engage and motivate learners leading to measurable success. Train teams in any location, in any language using a platform that's been tried and tested by users in more than 40 countries around the world.

view360global is ideal for:

- » **Training**
- » **Professional development**
- » **Testing and Assessment**
- » **Gap analysis**

Gain a competitive edge through better learning outcomes

Providing facilitator-led experiential learning promotes the successful transfer of skills and knowledge into the workplace. Its in-built flexibility provides options to train in-person or virtually. Whilst intuitively easy to use, our support team is always there to assist you.

Immersive

Use mixed media to simulate real-life scenarios, helping your people prepare for the real thing

Easy to Use

Whether on-site or remote learning, you get a training solution that is simple to set up and manage

Inclusive

Bring teams together with built-in video conferencing, 100+ language options and real-time translation

Measurable

Monitor and analyse the progress in real time for an immediate and dynamic measure of success

Learning by doing

Whether collaborating as a team or using the platform for individual assessment, learning and engagement is taken to the next level. Participants can experience decision making in a safe environment giving them freedom to explore ideas whilst allowing the facilitator to guide, challenge and support them. With improved opportunities for reflection and evaluation, better learning outcomes can be achieved.

Cognitas Global designs and delivers innovative learning technology which achieves measurable results and transformational change.

The **view360global** experiential learning platform delivers a holistic approach to learning by combining fundamental principles of learning with modern cloud-based technology, which has been used to deliver training to participants in 40 countries and has been licenced under our SaaS model by national infrastructure organisations and government agencies as a training tool of choice.

The **incident360** App is our latest tool to put crisis management planning into an easily accessible format for when it's really needed. By providing reporting, logging and checklist functionality it enables the effective management of a serious incident or crisis by the C-Suite or other persons tasked with managing the safety of an organisation and its people.
